about our complexious and figures, and yet not too much so. Few women but are born without possibilities of beauty and grace, and it is most assuredly our duty to develop such by every means in our power. Does it lie in our figures? Then let us study them. See that we dress hygienically, with care and becomingness.

Extravagance is wrong and unnecessary, but a well-gowned woman, with a lithesome, graceful and shapely figure, is a beautiful sight. To develop such, carrying out of the rules of hygiene, daily ablutions, regular exercise with dumbbells and a morning cycle ride, strict attention to your health and carriage, and care in your choice of dressmaker—these are a few of the secrets which help to make a perfect figure.

The opinion was that he has but a slight distance to go to leap past old Hermann, and we shall all warch his career with anxious interest and pride. The Utah Press association has secured the resort for July 4, 1897. The grandlest excursion over given to Castilla was under the association and next season promises The intefatigable Lyceum keeps going, storm or shine, heat or half. MARGE.

Yesterday was a busy day with Conductor Stephens of the tahernacle choir. His 350 singers and the friends who will accompany them to Denver, were organizing for the tour, and between rehearsals, giving out tickets, receiving money and answering a thousand and one questions, he and his aides, Mr. Ensign, had all they could attend to. The train will leave over the Union Pacific tomorrow morning at 10 o'clock, (atmost three years to a day since the choir left for the World's fair) and the singers' first appearance in Denver will be Tuesday evening. They also sing at the sessions of the Elisteddfod Wednesday and Thursday, and in the big concert which winds the affair up on Friday evening. They will start on the return Saturday and reach home on the Rio Grande a week from today. The choir sings as its first number the selection which probably roused more enthusiasm on the California tour than any other, "The Soldier's Chorus," from "Faust."

Salvini to the effect that he would make no tour of this country this season.—Mirror.

Consumption is a disease caused by impurity of the blood, and the first thing to be done in its treatment is to make the blood pure, rich and wholesome. That is half the battle. The other half is the impregnation of the blood with cleansing, healing, invisorating medicines. Dr. Pierce's Golden Medical Discovery does both. It first puts the whole digestive system into medical Discovery does not all the puts the whole digestive system into perfect order, rids it of all impurities, and from the vantage ground so gained, reaches out to every fibre of the body and restores all to perfect vigor. It cures many diseases, simply because many diseases spring from a set of common causes. The same disorder may lead to different symptoms in different people. What might be only a little indigestion in one person, may combine with a slight cold in another and result in consumption. A treatment that tones up the whole system is always the safest. A medicine that ment that tones up the whole system is always the safest. A medicine that is good for the general health is pretty sure to cure ordinary diseases.

In all the great European cities the fruit dealer sells peaches, pears and apples, etc., ornamented with armorial bearings, initials, names and designs of various kinds. This work is effected in a very simple way. Fine fruit is taken just before ripening and paper designs nearly out and pasted upon it. After a while these are removed, and the part of the fruit that has been covered is found to be of a beautiful clear white.
